3. SCOPE OF WORK

This Request for Proposal (RFP) is for the procurement of a Risk Management Information System (RMIS) to provide the Risk Management Division and its partner agencies a platform to report incidents; file claims; manage vehicle/equipment inventories and track real property assets. The goal of a RMIS system is to help ensure accurate and consistent tracking and real time reporting of the State's assets, insurance claims and risk management program activity.

Currently, the Division, Attorney General's Office (AGO) and State Public Works utilize various Microsoft Office applications to manage their claims and compile asset lists. Nevada Department of Transportation (NDOT) is currently using AssetWorks M-4 for their fleet management and asset tracking. The proposed solution must have the ability to import and export current asset information from/to those various applications.

The Division currently adjusts approximately 350 auto physical damage/property claims a year. The Attorney General's Office manages all liability claims; however, that partner agency is not looking to replace current processes or claim system at this time.

The chosen solution must have the ability to track assets including vehicles, equipment, and real property assets and have the capacity to upload documents pertaining to those reported assets. Currently, the Attorney General's Office (AGO) maintains approximately 6,000 vehicle records, the Nevada Department of Transportation databases hold approximately 2,500 equipment records and the State Public Works Division has approximately 3,300 building records within their databases representing multiple years.

Between the Division and its partner agencies there will be approximately thirty five (35) users who must be able to review, add notes, upload attachments, update values, create and run reports on varying

basis. Users need the ability to create, modify, and access information and reports. Users must have the ability to create and send customized reports to the other users on a scheduled basis. Database also must have a forward facing web site to provide public access to state owned and leased real property to fulfill legislative requirements.

3.1. PROJECT BACKGROUND

In 2014, Risk Management conducted a business case analysis to study the viability and benefits of implementing a Risk Management Information System (RMIS) to provide a unified platform for the Nevada State Risk Management Division to manage the State's Total Cost of Risk (TCOR). Additionally, this study identified several stakeholder agencies which could also benefit from having access to similar platform for their business needs. Those identified stakeholder agencies included the *Attorney General's Office* (AGO), the State Public Works Division (SPWD) and the Nevada Department of Transportation (NDOT).

As a result of that study, the State determined that a project development partnership among those stakeholder agencies would be beneficial to obtain a unified system for those participating agencies and would enable them to share resources. The project goals as a result of that Business Case Analysis and identified goals for each partner agency can be found in the embedded document.

3.2. PROJECT SPONSOR AND STEERING COMMITTEE

The Division is the project sponsor. All project activities will be conducted under the authority of the Division which will make the final determination as far as it relates to project priorities, alternatives and costs. Each partner agency will appoint a representative to act as their agency's project staff for this project. As part of the RFP process, the partner agencies formed a steering committee in order to identify specific system functionalities consistent with each agency's project goals. The Steering committee also serves as the RFP evaluation committee. Proposer should indicated willingness to meet with State to provide in-person demonstrations of their proposed solutions.

3.3. PROJECT MANAGER

The Division has been appointed as the Project Manager to coordinate the activities related to this project. The Project Manager will provide on-going direction and oversight to the Project Steering committee and will act as a conduit to the awarded vendor. The Project Manager will report progress and problems to the Steering Committee to ensure resource requirements are identified and addressed.

3.4. STATE PROJECT STAFF

3.4.1 The awarded vendor will be expected to work closely with the State project staff assigned to this project.

3.4.2 State project staff will be available to attend meetings, interviews and assist assigned staff in reviewing functions with the awarded vendor.

3.4.3 State project staff will be assigned to the project on an as-needed basis, as determined by project and technical management to represent the various functional and technical areas.

3.4.4 Project staff will also act as database administrator for their agency's assigned portion of the system and will identify the licensed users for their agency and determine level of access that is consistent with their agency's IT security standards.

3.4.5 State project staff will report any problems or concerns to the Project Manager who will act as a conduit to the awarded vendor.

4. PROJECT SOFTWARE

All software used for project management must be approved by the State. Accepted proposals will have solutions that utilize a cloud based or Software as a Service (SaaS) distribution model that would allow agencies to access the application via the Internet. Proposals should include detailed description as to the benefits and features of the software application and whether solution includes options and pricing for software application only vs. fully hosted solution.

The Division envisions accessing various system modules via a dashboard type interface in order to manage various first party (auto physical damage, property) claims and have expansion capability to track liability and workers compensation claims or to have the ability to interface with other asset management/claims tracking systems.

Agencies may access the web-based system either via desktop or mobile computing platforms. Additionally, Public Works and NDOT want to use the system to provide a platform for a forward facing website in order to allow public access to obtain information regarding state-owned and leased real property. The RMIS provider will be expected to be proactive and keep the Division abreast of changes in the RMIS software.

4.1 MINIMUM STANDARD SOFTWARE

4.1.1 All proposed software used in the design, development, testing and implementation of the deliverables outlined in this RFP must be approved by the State.

4.1.2 If the application software is not public domain, the awarded vendor must provide a licensing strategy.

4.2.5 Security requirements and evaluation/test procedures shall be included in all solicitation documents and/or acquisition specifications.

4.2.6 Systems developed by either internal State or contracted system developers shall not include back doors, or other code that would cause or allow unauthorized access or manipulation of code or data.

4.2.7 Security specifications shall be developed by the system developer for approval by the agency owning the system at appropriate points of the system development or acquisition cycle.

4.2.8 All system development projects must include a documented change control and approval process and must address the security implications of all changes recommended and approved to a particular service or system. The responsible agency must authorize all changes.

4.2.9 Application systems and information that become obsolete and no longer used must be disposed of by appropriate procedures. The application and associated information must be preserved, discarded, or destroyed in accordance with Electronic Record and Record Management requirements defined in NRS and NAC 239, Records Management.

4.2.10 Software development projects must comply with State Information Security Consolidated Policy 100, Section 4.7, Software Development and Maintenance and State Standard 131, "Security for System Development".

4.2.10.1 Separate development, test and production environments must be established on State systems.

4.2.10.2 Processes must be documented and implemented to control the transfer of software from a development environment to a production environment.

4.2.10.3 Development of software and tools must be maintained on computer systems isolated from a production environment.

4.2.10.4 Access to compilers, editors and other system utilities must be removed from production systems.

4.2.10.5 Controls must be established to issue short-term access to development staff to correct problems with production systems allowing only necessary access.

4.2.10.6 Security requirements and controls must be identified, incorporated in and verified throughout the planning, development, and testing phases of all software development projects. Security staff must be included in all phases of the System Development Lifecycle (SDLC) from the requirement definitions phase through implementation phase.

4.3 CLOUD PROVIDER QUESTIONNAIRE

The embedded questionnaire to be completed by all proposers for review by agency Information Security Officers.

5. FUNCTIONAL REQUIREMENTS – FUNCTIONAL MATRIX

Vendor must review the requirements matrix carefully to ensure that the proposed system design addresses all of the requirements. The embedded Functional Matrix outlines the functionality that each partner agency desires in the proposed solution.

Those functions noted within the Priority column of the embedded spreadsheet as Essential should be considered a requirement of the initial base system implementation and cost for those functions should be included within the vendor's base pricing.

Those functions noted as Important can be included within initial system proposal and costs would be given priority over those proposals that can only provide for Essential functions.

Those functions noted as Desirable and/or Future are functions that agencies may consider for future planning and development purposes so Proposers are asked to include those functions within an optional pricing quote.

Within the proposal, vendors' responses must provide information regarding their approach to meeting the functional requirements described within Sections 5.1 through 5.8 of the embedded document below. Vendor's responses within the vendor's project plan should tie by function number by properly coding and indicating how the requirement is satisfied. The proposed costs and project plan must reflect the efforts needed to satisfy the requirements. If subcontractors will be used for any of the tasks, vendors must indicate what tasks and the percentage of time subcontractor(s) will spend on those tasks.

6. PROJECT PLANNING AND OTHER DELIVERABLES

The objective of this task is to ensure that adequate planning and project management are dedicated to this project. Project should be broken down into tasks, activities and deliverables. The tasks and activities within this section are not necessarily listed in the order that they should be completed. Vendors must reflect within their proposal and preliminary project plan their recommended approach to scheduling and accomplishing all tasks and activities identified within this RFP. All tasks performed by awarded vendor may be reviewed by Project Manager and the Project Steering Committee.

6.1. PROJECT PLAN

The awarded vendor must work with the State to provide a detailed project plan with fixed deadlines that take into consideration the State holiday schedule provided in *Section 2.1, State Observed Holidays* to include, but not be limited to:

- A. Project schedule including tasks, activities, activity duration, sequencing and dependencies;
- B. Project work plan for each deliverable, including a work breakdown structure;
- C. Completion date of each task;
- D. Project milestones;
- E. Entrance and exit criteria for specific project milestones; and
- F. Project organization including a resource plan defining roles and responsibilities for the awarded vendor, subcontractors (if applicable) and State.

6.2. PROJECT MEETINGS

Attend and participate in all project related meetings requested by the State at a location to be determined by the State. Attendance may be in person or via teleconferencing, as mutually agreed to by the State and Vendor's project team. These meetings shall follow an agenda mutually developed by the awarded vendor and the State. The awarded vendor shall prepare materials or briefings for these meetings as requested by the State. Minutes will be taken and distributed by State staff within five (5) working days after the meeting.

Minutes may be distributed via facsimile or email.

The agenda may include, but not be limited to:

- A. Review and approval of previous meeting minutes;
- B. Contractor project status;
- C. State project status;
- D. Contract status and issues, including resolutions;
- E. Quality Assurance status;
- F. New action items;
- G. Outstanding action items, including resolutions;
- H. Setting of next meeting date; and
- I. Other business.

6.3. COMMUNICATION PLAN

Develop a comprehensive approach for handling communications with both internal and external audiences. Effective communication is critical to the development of productive relationships with concerned stakeholders. The communication plan must include, but not be limited to: a plan for generation, documentation, storage, transmission and disposal of all project information.

6.4. PROJECT STATUS REPORT

Provide written project status reports delivered to State by the third (3rd) working day following the end of each reporting period. Reporting period to be determined based on agreed timetable as determined at beginning of project. The format must be approved by the State prior to issuance of the periodic project status report.

6.5. TRAINING

State anticipates a minimum of five staff members to act as "system administrators" for their assigned portion of the system. To be successful in that role, those administrators need training for tasks such as how to setup Users, determine access levels or how to customize data fields in order to meet the agencies' needs. Additionally, the State would also need the Vendor's assistance with providing User documentation for the system as a

whole. State anticipates initially thirty-five (35) total Users, with fifteen (15) Users logged in on a concurrent basis.

6.6. POST IMPLEMENTATION EVALUATION REVIEW

The State will perform a Post Implementation Evaluation Review (PIER) approximately six (6) months after full implementation and State acceptance of all deliverables. That review will be part of the schedule as part of meetings between the State and the Vendor as part of the ongoing support function.

6.7. ONGOING SUPPORT AND REVIEW

As part of the ongoing licensing agreement, State looks to the Vendor to provide ongoing technical support to the State. State would expect Vendor user support technicians to be available Monday – Friday, during normal business hours of 8AM to 5 PM, PST. As part of the ongoing support, Vendor and State will enter into a service level agreement (SLA) outlining the expected overall system performance, technical support provided and detailed steps for troubleshooting/problem resolution.

As part of the solution, Division and its partner agencies may look for opportunities for future expansion based on either desired functionalities as identified within Section 5.1 through 5.8 of the embedded functional matrix or those opportunities that become available as part of system advances. State and Vendor will meet to review those needs prior to each subscription/licensing renewal.

- 14.1.7 The State shall not be obligated to accept the lowest priced proposal, but will make an award in the best interests of the State of Nevada after all factors have been evaluated (NRS §333.335).
- 14.1.8 Any irregularities or lack of clarity in the RFP should be brought to the Risk Management Division designee's attention as soon as possible so that corrective addenda may be furnished to prospective vendors.

- 14.1.14 Prices offered by vendors in their proposals are an irrevocable offer for the term of the contract and any contract extensions. No other costs, rates or fees shall be payable to the awarded vendor for implementation of their proposal.
- 14.1.15 The State is not liable for any costs incurred by vendors prior to entering into a formal contract. If vendors do not specify any exceptions and/or assumptions at time of proposal submission, the State will not consider any additional exceptions and/or assumptions during negotiations.

In the event of any conflict or contradiction between or among these documents, the documents shall control in the following order of precedence: the final executed contract, any modifications and clarifications to the awarded vendor's proposal, the RFP, and the awarded vendor's proposal. Specific exceptions to this general rule may be noted in the final executed contract.

- 14.2.6 Local governments (as defined in NRS 332.015) are intended third party beneficiaries of any contract resulting from this RFP and any local government may join or use any contract resulting from this RFP subject to all terms and conditions thereof pursuant to NRS 332.195.
